

1. FIT & COMFORT:

a) How do you rate the fit and comfort level of your prosthesis?

- | | |
|--|---|
| Fit and comfort of prosthesis is good and does not impact on work / leisure activities. | 4 |
| Fit and comfort of prosthesis is fairly good but experience slight difficulty with some work / leisure activities | 3 |
| Fit and comfort of prosthesis is adequate but experience moderate difficulties in developing and undertaking work / leisure activities | 2 |
| Fit and comfort of prosthesis is poor but able to develop and undertake work / leisure activities | 1 |
| Fit and comfort of prosthesis is poor and have difficulty developing and undertaking work / leisure activities | 0 |

2. QUALITY & PERFORMANCE OF PROSTHESIS:

a) How do you rate the quality and performance (feel, weight, durability, appearance) of your prosthesis?

- | | |
|---|---|
| Quality and performance of prosthesis is good and does not impact on quality of life | 4 |
| Quality and performance of prosthesis is good but occasionally impacts on quality of life | 3 |
| Quality and performance of prosthesis is inconsistent and impact on quality of life is variable | 2 |
| Quality and performance of prosthesis is poor and impacts on many aspects quality of life | 1 |
| Quality and performance of prosthesis is very poor and significantly impacts on quality of life | 0 |

3. SKIN INTEGRITY:

a) How do you rate the effect of the prosthesis on your skin integrity?

Skin integrity is good and does not interfere with quality of life.	4
Skin integrity is good and only occasionally interferes with quality of life.	3
Skin integrity is inconsistent and occasionally interferes with quality of life.	2
Skin integrity is poor and frequently interferes with quality of life.	1
Skin integrity is poor and restricts quality of life (ie. Lengthy periods confined to bed)	0

4. PAIN & SENSATION:

a) How do you rate the pain and / or sensation associated with using your prosthesis?

Experience no pain or sensation	4
Experience minor pain and / or sensation occasionally but does not impact on daily living activities	3
Experience minor pain and / or sensation occasionally that affects some activities of daily living	2
Experience pain and / or sensation frequently that restricts daily living activities	1
Experience significant pain and / or sensation that restricts most activities of daily living	0

5. PHYSICAL ABILITY:

a) How do you rate your mobility when using your prosthesis?

Mobility is good and independent in all physical activities	4
Mobility is fairly good but experience slight difficulty on some physical activities	3
Mobility is restricted and experience difficulty on some physical activities (ie sitting to standing, walking upstairs)	2
Mobility is poor and restricts physical activities	1
Mobility is very poor and significantly restricts physical activities	0

6. INDEPENDENCE IN USE OF PROSTHESIS:

b) How do you rate your level of independence in using your prosthesis?

Totally independent in all aspects of use (ie donning and doffing)	4
Independent in most aspects of use but occasionally need assistance	3
Need regular assistance in some aspects of use	2
Need regular assistance in most aspects of use	1
Totally dependent on another for assistance to use prosthesis	0

7. CARE & MAINTENANCE OF PROSTHESIS:

b) How do you rate your ability to care for and maintain your prosthesis?

Completely independent in care and maintenance of prosthesis	4
Able to care for and maintain prosthesis but experience slight difficulty on some tasks	3
Able to care for and maintain prosthesis but require assistance with some tasks	2
Moderately dependent on other people to care for and maintain prosthesis	1
Completely dependent on other people to care for and maintain prosthesis	0

8. RELATIONSHIPS WITH FAMILY/FRIENDS:

a) How do you rate the response of family/friends to the prosthesis?

Response to prosthesis is very good and does not impact on relationships	4
Response to prosthesis is fairly good with only minimal changes in some relationships	3
Response to prosthesis is occasionally poor but generally able to maintain good relationships	2
Response to prosthesis is often poor and some relationships have been effected	1
Response to prosthesis is generally poor and some relationships have been significantly effected.	0

Thankyou for completing this survey.
